Website

Existing Products

We developed a tender management system to ease tendering process named MyTender

ATHENAEUM

Additionally, we have our Electronic Document Management System (EDMS) called ATHENAEUM

SCHINKELS ERP SERVICES

Schinkels ERP Services offers the necessary tools and abilities to propel your organization towards growth and achievement

DIVISIONS

Engineering Division

At Schinkels we are specialized in various cold chain solutions utilizing the latest technology to meet customer demand for various industries.

Our products include refrigeration, freezer systems, monitoring systems, medical equipment, and more.

Technology Division

Schinkels Technik wants to help you achieve the necessary growth for your organization by being a catalyst as your customer and partner.

We create IT systems using Servers, Storage, Software, and Network components.

Software Development

We can make your digital ideas come true with our top-notch software development services. Our skilled computer experts make bespoke computer programs that fit your business requirements.

Schinkels Technik uses advanced technologies and programming languages to create computer programs that are tailored to your business needs. We test them thoroughly to ensure they work well and meet all your quality standards.

Some of examples of advance web applications we can develop for you are:

- tracking users interest
- shopping carts
- business intelligence models
- work process modeling
- lot data collection

Get in touch with us to find out more and how to boost your business!

Advance WEB

Schinkels has deployed applications using leading-edge technologies. This includes extensions to Web standards, the combination of various Web technologies, Web toolkits and development environments, current Web frameworks (e.g. Node & Express, Django, Ruby on Rails), and frontend Web frameworks (e.g. Angular, React, Vue. js, Ember.)

We want to make sure our customers get the best out of the industries.

Cloud Solution

Cloud solutions are services that give you access to computer resources over the internet.

In Schinkel's Technik we are using various cloud platforms including Amazon Web Services (AWS). These are used to provide our customers with their very own data centers infrastructure.

These cloud platforms are tools that helps organization put their apps online quickly and safely. You only pay for what you use.

Mobile 360

A type of application software designed to run on a mobile device, such as smartphone or tablet computer.

Creating a mobile app can help businesses share different types of information with their customers.

We can create apps that can send messages on people's phones to let them know about new things or good deals at the right time.

Full Cycle Integration

We want to ensure that you are engaged in the implementation of the solution. We applied Integrated Lifecycle Management from creation to final disposition.

It includes a strategy, process, and technology to effectively manage information that, when combined, improves the control of information in your enterprise.

We use tools to ensure real time updates to customers on their software development.
